

# AMD EPYC™ PROCESSORS

ENABLING SOLUTIONS FOR THE MODERN DATA CENTER

MICHAEL DETWILER

SENIOR MANAGER, AMD SERVER BUSINESS UNIT

# LEADERSHIP ROADMAP AND EXECUTION

# 2<sup>ND</sup> GENERATION AMD EPYC™

## UNLOCKING A NEW CLASS OF PERFORMANCE

**64** 48, 32, 24, 16, 12, 8  
cores per socket

For VM Density and  
Compute Throughput

**128** PCIe® 3/4\* lanes  
in a single CPU

To Help Reduce IO  
Bottlenecks

**8** Memory channels  
per CPU

To Feed the Cores

**4** <sup>UP TO</sup>  
**TB** RAM per  
socket support

For In-Memory Analytics

# EPYC™ PERFORMANCE OPTIMIZED SKUS

## APPLICATION PERFORMANCE - MORE THAN JUST FREQUENCY

### HIGH-PERFORMANCE

High Performance “Zen 2” core  
High base and boost frequencies  
7nm process delivers more performance for less power

### CPU ARCHITECTURE

Large L3 cache located close to cores provides low latency access to critical data.  
Infinity Architecture enables linear scaling

### SYSTEM DESIGN

Reduce bottlenecks with industry leading 8 channels of DDR4-3200 memory and up to 128 lanes of PCIe® 4.0 connectivity

Processor	Cores	Base Freq. (GHz)	Max. Freq (GHz)	Max Mem Speed (MHz)	Max Memory Capacity	PCIe®	L3 cache (MB)
AMD EPYC™ 7F32	8	3.7	3.9	3200	4TB	Gen4	128
AMD EPYC™ 7F52	16	3.5	3.9	3200	4TB	Gen4	256
AMD EPYC™ 7F72	24	3.2	3.7	3200	4TB	Gen4	192

# NEW TICK-TO-TRADE SOLUTION

AMD  
EPYC

Lenovo™

XILINX®

LDA TECHNOLOGIES™

Lenovo ThinkSystem™ SR665

## Solution advantages

- Under 25 nanoseconds Tick-to-Trade backed up by a STAC Research T0 benchmark
- Dual board solution leveraging patented Xilinx Delegated Sends technology along with LDA Technologies Lightspeed v.2 TCP
- Lenovo SR665 is an excellent platform for building performant trading solutions
- All powered by AMD EPYC™ processors

# EPYC™ CLOUD SOLUTIONS MOMENTUM

Google Cloud

IBM Cloud

CLOUD

Estimated 150+ AMD EPYC-based cloud instances available in 2020

## Google Cloud Platform Confidential VMs – Powered by 2nd Gen AMD EPYC™ Processors

1st product in the Google portfolio designed to secure data in a virtualized environment with AMD EPYC™ CPU-enabled hardware-based security.

Google Cloud
