

# Meeting FINRA and MIFID Regulations with High Accuracy NTP

Jeremy Onyan  
John Fischer

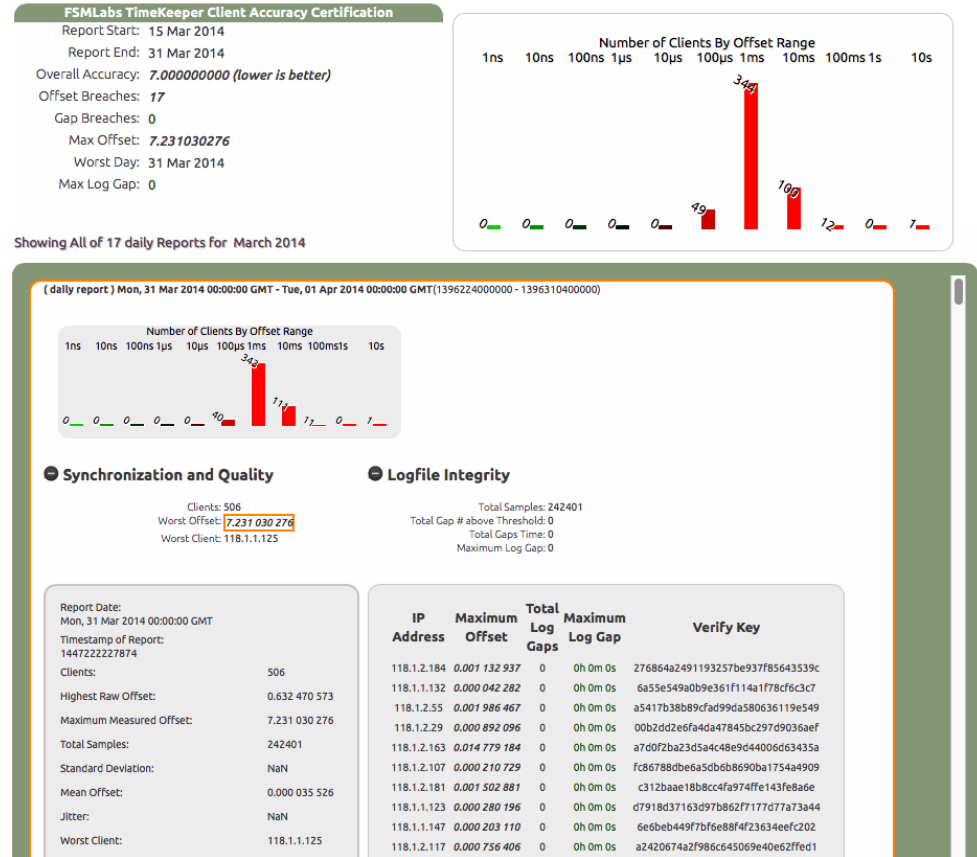

# Internet NTP Sites

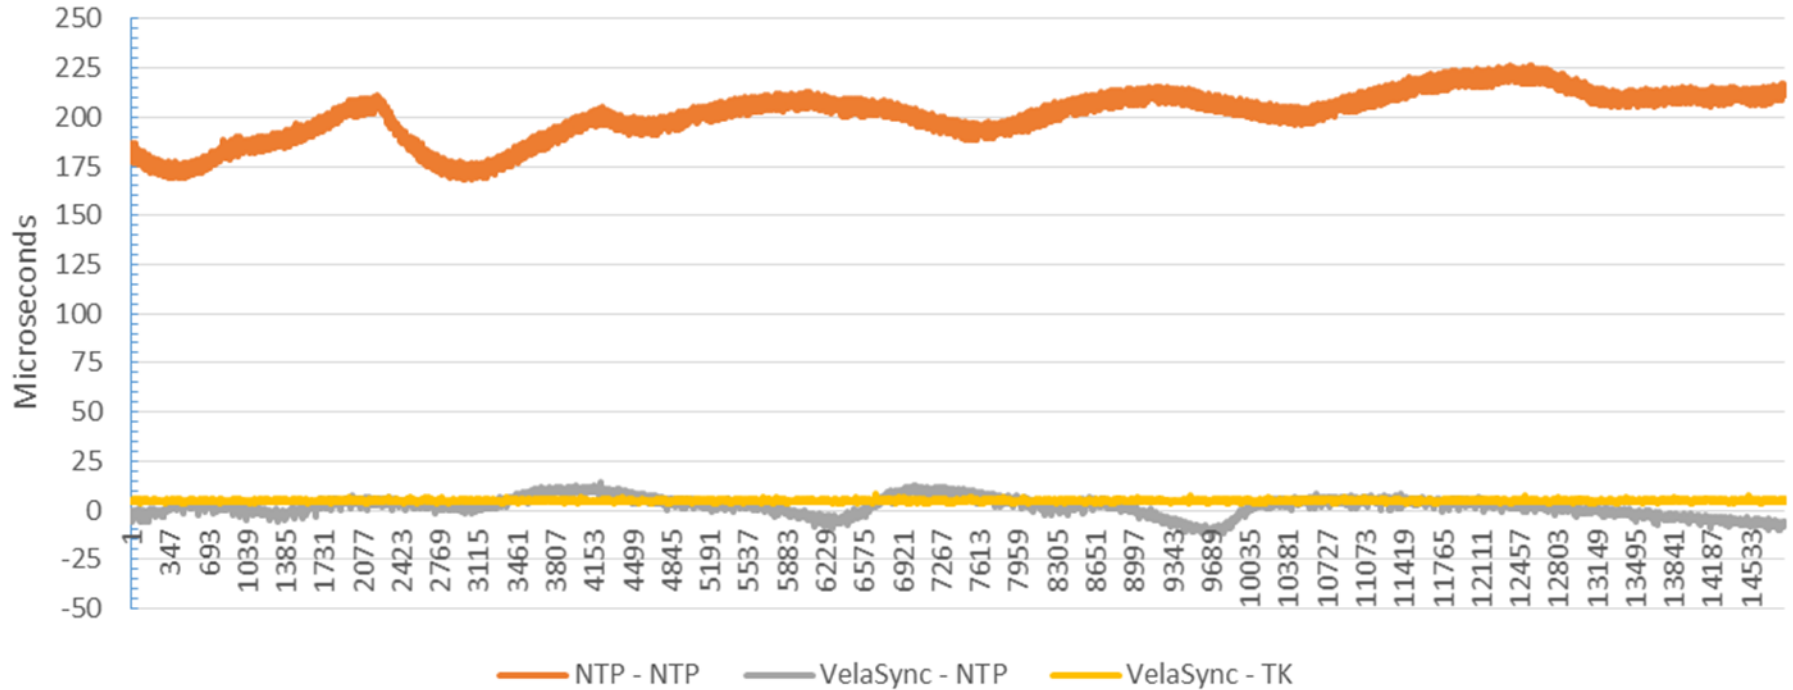

# MiFID II Auditing/Reporting Tool

- VelaSync will provide easy, at-a-glance auditing and reporting tools
- Summary information and histograms
- See synchronization and quality of the system and all connected clients
- Check integrity of collected log files
- Customize report views over different time intervals and periods

# HW Assisted NTP v. NTPd

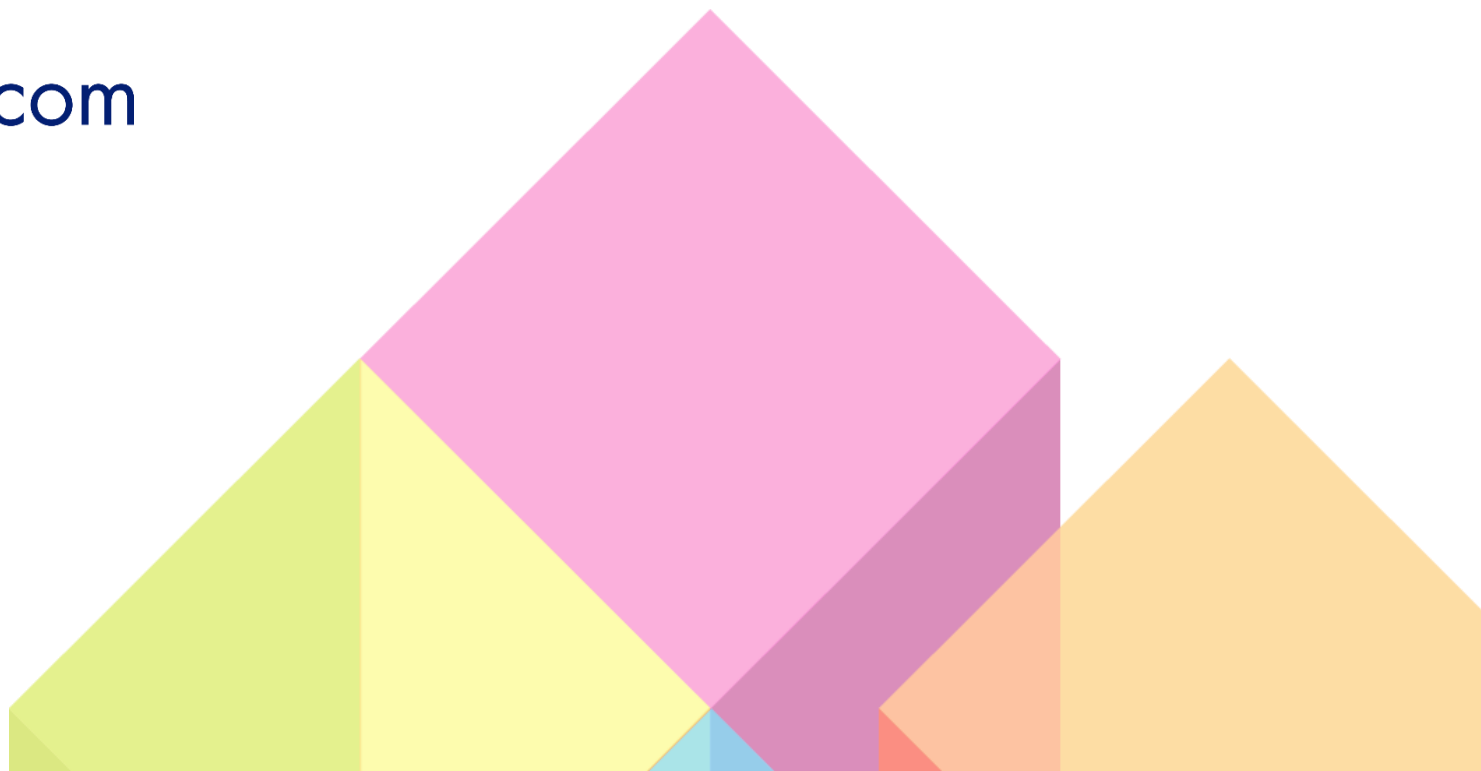

*Not STAC Benchmarks*

# Spectracom VelaSync

VelaSync allows you to meet all of the requirements for FINRA and MiFID II time sync requirements

- High speed, high performance – specifically designed for high frequency trading
- Standard with 2x **10G** ports, 3x 1G ports – all capable of **PTP** and **NTP** simultaneously
- Available with additional 2x **10G**, 2x **25G** ports, or 2x **40G** ports as an option
- Standard high performance oven controlled crystal oscillator (OCXO) with **Rubidium** as option
- Dual hot swappable power, 500G drives in RAID configuration
- Advanced monitoring and logging capabilities
- MiFID II Auditing/Reporting Tool coming soon

Thank You
