

Building a Time-Series Database for Financial Market Data

Nicolas Hourcard, co-founder/ceo

nic@questdb.io

Background

Team with decades of experience building low-latency trading software and large-scale databases

Fastest growing open source time-series database

★ Starred 14.4k

Contributors 146

Raised funding from top US Venture Capital firms who previously invested in: *Redis Labs, GitLab, Docker, Airbnb, Stripe, Dropbox, Cruise, Mulesoft*

Database Popularity (DB-Engines.com)

Oct 2024	Oct 2023	DBMS	Database Model	Oct 2024	Oct 2023
1.	1.	InfluxDB 	Time Series, Multi-model 	22.39	-7.35
2.	2.	Kdb 	Multi-model 	7.72	-0.67
3.	3.	Prometheus	Time Series	7.31	+0.03
4.	 5.	Graphite	Time Series	5.00	-0.22
5.	 4.	TimescaleDB	Time Series, Multi-model 	3.79	-1.58
6.	 10.	QuestDB	Time Series, Multi-model 	2.83	+0.68
7.	7.	Apache Druid	Multi-model 	2.79	-0.31
8.	 6.	DolphinDB	Multi-model 	2.67	-1.27

QuestDB under the hood

↳ Built from scratch for performance

Built from scratch for market data

Ideal data layout for fast queries:
Columnar store & time partitioned

Relational model: Tables, ASOF JOINS, SQL

Heavy parallelism: SIMD instructions, SQL JIT
Compiler

trades			
ts	price	symbol	qty
ts01	178.08	JPM	1000
ts02	148.66	V	400
ts03	424.86	JNJ	5000
ts04	178.09	AMD	100
ts05	505.08	BAC	2500
ts06	394.14	KO	2000
...

Open formats and tiered storage

Streaming

Data
X hours old

Streaming on the way in
5M rows/sec/server

**Open format storage on
the way out**

Benefits of QuestDB

No vendor lock-in: Open formats (Parquet & Arrow), open source

Lower TCO: Easy access via SQL, cost-efficient data retention, low Maintenance

Performance for market data: Fast ingestion, millisecond queries, efficient handling of order book data

Lightning-fast queries

⤴ with SQL

SAMPLE BY

```
SELECT
    timestamp,
    vwap(price, amount) AS vwap_price
FROM trades
WHERE symbol = 'BTC-USD'
SAMPLE BY 15m
